TOP 5 REASONS
TO CHOOSE A10 NETWORKS

1

A10 ADC SOLUTION
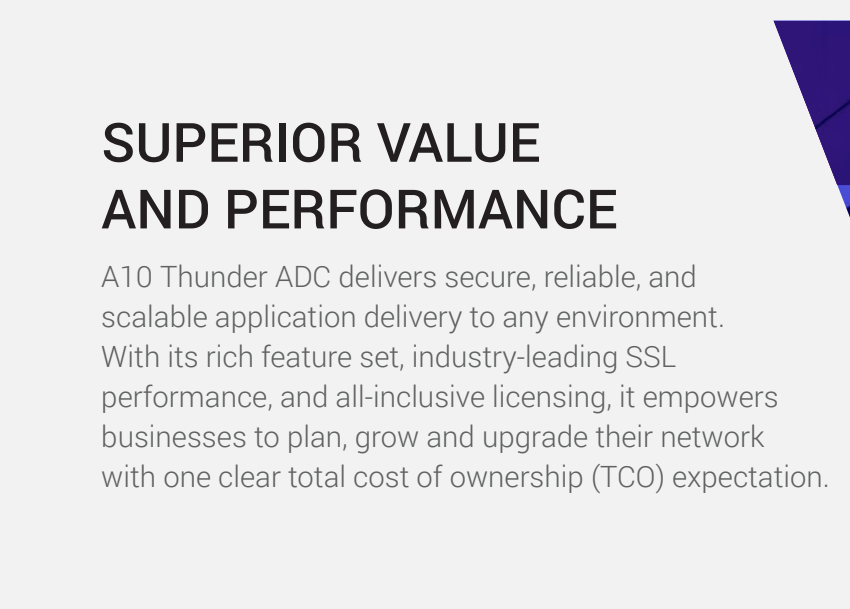

ANY CLOUD-ANY APP

The A10 Networks ADC solution can help organizations seamlessly extend their application journey to multi-cloud for increased agility and innovation. A10 Thunder ADC is a complete product portfolio from hardware appliances to software solutions, including virtual, a container-based cloud-native solution, and bare metal, which can help customers ensure compliance, consistency, and security across all application environments.
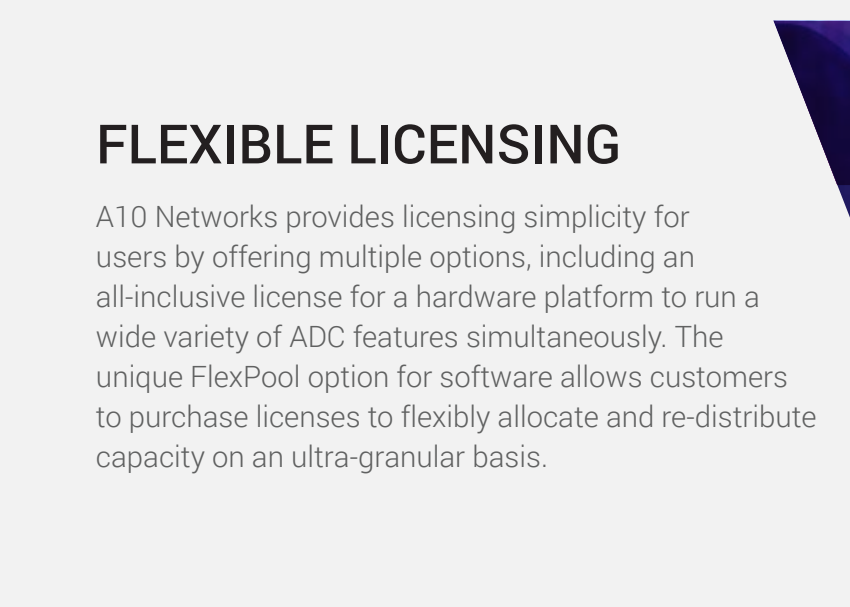

2

SUPERIOR VALUE AND PERFORMANCE

A10 Thunder ADC delivers secure, reliable, and scalable application delivery to any environment. With its rich feature set, industry-leading SSL performance, and all-inclusive licensing, it empowers businesses to plan, grow and upgrade their network with one clear total cost of ownership (TCO) expectation.

ONE CLEAR TCO

DEEP VISIBILITY & AUTOMATION

The A10 Harmony controller defines a new benchmark of simplicity for application management, automation and security. A10 Harmony controller centrally manages automation, ensures compliance and delivers consistent policy enforcement across on-premises and multi-cloud deployments. Per-app analytics from the controller delivers deeper visibility and actionable intelligence for increased efficiency and faster troubleshooting.

A10 HARMONY CONTROLLER

FLEXIBLE LICENSING

A10 Networks provides licensing simplicity for users by offering multiple options, including an all-inclusive license for a hardware platform to run a wide variety of ADC features simultaneously. The unique FlexPool option for software allows customers to purchase licenses to flexibly allocate and re-distribute capacity on an ultra-granular basis.

LICENSING SIMPLICITY

WORLD-CLASS SUPPORT

A10 Networks provides world-class technical support using experienced system and escalation engineers, as well as core software and hardware engineers, providing immediate assistance and easy escalation paths.
